

Roofing and Waterproofing: Ensuring Protection.

bcbuildingscience.com

We understand the critical role that roofing and waterproofing systems play in safeguarding your property. Whether it's shielding you from rain, snow, or harsh elements, these defense systems require ongoing attention to ensure their longevity. Our expertise lies in roofing and waterproofing renewals, and we follow a comprehensive process to deliver exceptional results:

Following this general process we have provided services to all different types of roofing including:

Asphalt Shingle Renewals

Including assessment of ventilation strategies.

Slab Waterproofing Membrane Renewals

Including full landscape updates.

Roofing Membrane Renewals

Including energy assessment for insulation upgrades.

With extensive expertise in all aspects of building science, BC Building Science is available to provide a team of in-house RCABC (Roofing Contractors Association of BC) Roof Observers and Registered Roofing Observers (RRO - IIBEC) to assist and guide your renewal. With our unmatched expertise in new construction buildings we are connected to the best roofing contractors available. As well, we have successfully managed millions of dollars of renewals and repairs on existing buildings and can bring that expertise to your building needs.

Trust BC Building Science for professional roofing and waterproofing solutions. Your protection is our priority!
